Vulnerability Assessment & Penetration Test Report

Assessment ID: 0ef8cf7c-de50-40fe-a2e3-38ffe4aabff9

Target: lab.vapt.local

Generated: 2026-11-09 15:43 UTC

1. Executive Summary

This authorized lab assessment addressed: Perform authorized web and network VAPT on lab target and produce client-ready report.. The agent orchestrated 3 tool executions/imports, correlated 15 unified findings with evidence traceability.

2. Assessment Methodology

Workflow: scope validation → adaptive planning → approved scan orchestration → ingestion → AI correlation → risk prioritization → human approval → reporting. References: NIST SP 800-115, OWASP Top 10, CVSS concepts.

3. Severity Distribution

Severity	Count
high	2
info	2
low	3
medium	8

4. Detailed Findings

1. Cross Site Scripting (Reflected) [HIGH]

Assets: http://lab.vapt.local:8080 | Sources: OWASP ZAP | Confidence: 0.88 | Status: suspected | Kind: observed

Reflected XSS identified on search parameter.

Reference: CWE-79

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\zap_sample.json

Remediation: Encode output, apply CSP, and validate inputs server-side.

2. OSVDB-3233: /icons/ directory indexing enabled [HIGH]

Assets: http://lab.vapt.local:8080 | Sources: Nikto | Confidence: 0.85 | Status: suspected | Kind: observed

OSVDB-3233: /icons/ directory indexing enabled

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\nikto_sample.txt

Remediation: Disable directory listing and restrict exposed paths.

3. Missing Anti-clickjacking Header [MEDIUM]

Assets: http://lab.vapt.local:8080 | Sources: OWASP ZAP | Confidence: 0.88 | Status: suspected | Kind: observed

The response does not protect against 'ClickJacking' attacks.

Reference: https://owasp.org/www-community/attacks/Clickjacking

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\zap_sample.json

Remediation: Add security headers (CSP, X-Frame-Options, HSTS as applicable).

4. /admin/: Admin login page found [MEDIUM]

Assets: http://lab.vapt.local:8080 | Sources: Nikto | Confidence: 0.85 | Status: suspected | Kind: observed

/admin/: Admin login page found

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\nikto_sample.txt

Remediation: Review configuration and apply vendor hardening guidance.

5. Apache/2.4.41 appears to be outdated (current is at least Apache/2.4.54) [MEDIUM]

Assets: http://lab.vapt.local:8080 | Sources: Nikto | Confidence: 0.85 | Status: suspected | Kind: observed

Apache/2.4.41 appears to be outdated (current is at least Apache/2.4.54)

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\nikto_sample.txt

Remediation: Review configuration and apply vendor hardening guidance.

6. Cookie PHPSESSID created without the httponly flag [MEDIUM]

Assets: http://lab.vapt.local:8080 | Sources: Nikto | Confidence: 0.85 | Status: suspected | Kind: observed

Cookie PHPSESSID created without the httponly flag

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\nikto_sample.txt

Remediation: Review configuration and apply vendor hardening guidance.

7. Server: Apache/2.4.41 [MEDIUM]

Assets: http://lab.vapt.local:8080 | Sources: Nikto | Confidence: 0.85 | Status: suspected | Kind: observed

Server: Apache/2.4.41

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\nikto_sample.txt

Remediation: Review configuration and apply vendor hardening guidance.

8. Target Hostname: lab.vapt.local [MEDIUM]

Assets: http://lab.vapt.local:8080 | Sources: Nikto | Confidence: 0.85 | Status: suspected | Kind: observed

Target Hostname: lab.vapt.local

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\nikto_sample.txt

Remediation: Review configuration and apply vendor hardening guidance.

9. Target IP: 10.10.10.10 [MEDIUM]

Assets: http://lab.vapt.local:8080 | Sources: Nikto | Confidence: 0.85 | Status: suspected | Kind: observed

Target IP: 10.10.10.10

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\nikto_sample.txt

Remediation: Review configuration and apply vendor hardening guidance.

10. Target Port: 8080 [MEDIUM]

Assets: http://lab.vapt.local:8080 | Sources: Nikto | Confidence: 0.85 | Status: suspected | Kind: observed

Target Port: 8080

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\nikto_sample.txt

Remediation: Review configuration and apply vendor hardening guidance.

11. Open port 443/tcp (https) [LOW]

Assets: 10.10.10.10:443/tcp | Sources: Nmap | Confidence: 0.95 | Status: suspected | Kind: observed

Service https detected on 10.10.10.10:443/tcp.

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\nmap_sample.xml

Remediation: Close unnecessary services or restrict access with firewall rules.

12. Open port 80/tcp (http) [LOW]

Assets: 10.10.10.10:80/tcp | Sources: Nmap | Confidence: 0.95 | Status: suspected | Kind: observed

Service http detected on 10.10.10.10:80/tcp.

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\nmap_sample.xml

Remediation: Close unnecessary services or restrict access with firewall rules.

13. X-Content-Type-Options Header Missing [LOW]

Assets: http://lab.vapt.local:8080 | Sources: OWASP ZAP | Confidence: 0.88 | Status: suspected | Kind: observed

The Anti-MIME-Sniffing header X-Content-Type-Options was not set.

Reference: CWE-693

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\zap_sample.json

Remediation: Add security headers (CSP, X-Frame-Options, HSTS as applicable).

14. Open port 22/tcp (ssh) [INFO]

Assets: 10.10.10.10:22/tcp | Sources: Nmap | Confidence: 0.95 | Status: suspected | Kind: observed

Service ssh detected on 10.10.10.10:22/tcp.

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\nmap_sample.xml

Remediation: Close unnecessary services or restrict access with firewall rules.

15. Open port 8080/tcp (http-proxy) [INFO]

Assets: 10.10.10.10:8080/tcp | Sources: Nmap | Confidence: 0.95 | Status: suspected | Kind: observed

Service http-proxy detected on 10.10.10.10:8080/tcp.

Evidence: C:\Users\vissh\Documents\My Projects\Hackathon Projects\DataOps Innovation Hackathon 2026\Project\fixtures\nmap_sample.xml

Remediation: Close unnecessary services or restrict access with firewall rules.

5. Tool Execution Summary

Tool	Mode	Status	Output
Nmap	live	import_fixture	C:\Users\vissh\Documents\My Projects\Hackathon Pro
Nikto	import	import_fixture	C:\Users\vissh\Documents\My Projects\Hackathon Pro
OWASP ZAP	import	import_fixture	C:\Users\vissh\Documents\My Projects\Hackathon Pro

6. Limitations & Approvals

Testing limited to organizer-authorized lab targets. Active exploitation requires explicit human approval (audit trail retained). LLM/agent conclusions are grounded in tool outputs; inferred items are labeled.

Human approval events:

2026-11-09T15:43:18.782242+00:00: 2 validation action(s)

2026-11-09T15:43:20.826057+00:00: Demo approval for hackathon video
